

NORTH PORT QUAY

Revitalising Fremantle and Western Australia

West Australians love Perth's beaches.

We all love to sip coffee or share lunch or dinner with good friends and family while enjoying the spectacular coastal views and cooling sea breezes.

But our coastline is under enormous pressure, more people want to live and play by the sea so they can enjoy the coastal lifestyle.

North Port Quay will relieve this pressure with 10,000 new homes and provide a world-class destination for visitors while revitalising Fremantle and creating thousands of jobs.

This exciting development would create more than 100 new restaurants and cafes, three new public beaches, boutique shopping, entertainment, a surf wave-machine, cycleways, fishing, boat launching ramps and free parking for 5,000 cars.

North Port Quay will be powered by wind, wave and solar energy and will help provide a solution to Perth's unsustainable urban sprawl.
